Mobilkom Austria Deploys UMTS/GPRS Performance Reporting Solution From Nexus Telecom

Mobilkom Austria, Austria's market and innovation leader in the mobile communications sector, and Nexus Telecom AG, part of the Swiss-based Noser Group of companies, have deployed Nexus Telecom's Performance Reporting Suite to support their 2.5 and 3G mobile services. NexusMETER and NexusINFORMER support planning, service and quality assurance of Mobilkom's core UMTS and GPRS networks.

Mobilkom Austria uses the software suite from Nexus Telecom to facilitate the expansion of their core UMTS network, as well as to insure the high customer expectation levels of their UMTS and GPRS services.

Crucial to Mobilkom's decision to partner with Nexus Telecom was not only the technical capabilities of their product, but also the specific know-how of Nexus Telecom's employees and the rapid response to Mobilkom's stringent demands.

«Nexus convinced us with their initiative and competency, particularly during the initial trials» said Dr. Fleischer, Director of Mobilkom's Packet Core Planning.

«Mobilkom Austria's decision to partner with us is particularly important for Nexus as Mobilkom is one of the leading network operators and service providers in Europe. During a very challenging trial and evaluation period, Nexus, as a medium sized Swiss Enterprise, successfully won over very strong international competition.» Said Alain Giger, Sales Manager of Nexus Telecom AG.

About NexusMETER and NexusINFORMER Performance Reporting Software

NexusMETER and NexusINFORMER, part of Nexus Telecom's Performance Reporting Suite, generate and deliver important statistics and graphical information about network usage and capabilities. This crucial information helped Mobilkom make the correct decisions about configuring and extending their networks and services.

In addition, information about the quality of services provided is reported, helping Mobilkom meet service level agreements with their customers.

About Mobilkom Austria

Mobilkom Austria (www.mobilkomaustria.com) was founded in 1996 and has since become the most successful member of the Telekom Austria Group. During the third quarter of 2003, Mobilkom Austria served over 4.6 million customers in Austria, Croatia, Slovenia, and Lichtenstein. With 3665 employees, Mobilkom Austria achieved 2003 3rd quarter revenues of 537.1 million Euros, with EBITDA growth of 208 million Euro. These excellent results have been achieved by Mobilkom Austria's high percentage of High Value Customers (business customers) who appreciate the innovative and high quality products offered by Mobilkom Austria. Other recent milestones include the deployment of Europe's first national UMTS network on 25 September 2002, and the launch of 3G services on 25 April 2003.

About Nexus Telecom AG

Founded in 1994, Nexus Telecom (www.nexustelecom.com) is a privately-held company with headquarters in Zurich, Switzerland and a North American subsidiary in Ottawa, Canada. With over 200 employees, Nexus Telecom is a major OSS/BSS vendor delivering state-of-the-art telecom management and billing solutions to 2G, 3G, NGN and VoIP service providers and network operators worldwide.

With customers in over 100 countries, Nexus Telecom solutions assure service quality and revenue streams for many of the world's best-known telecom operators. Nexus partners include leading network manufacturers such as Siemens, Nortel, Lucent, Nokia, Ericsson, and Acterna.

The Next Generation... NexusHORIZON

Following on the success of the Nexus Reporting Suite, Nexus Telecom is proud to announce the introduction of NexusHORIZON, our next-generation performance suite providing such new features as SLV: Rules-based Service Level Verification module (GUI based) providing QoS reporting and fault management system integration, and a Web-based Customer Portal providing secure remote access to network data for end customers (2006). Please check our website at www.nexustelecom.com for the latest details.
